Advantages of Establishing an SBR

The need to have a Statistical Business Register is for **coherence**, **efficiency** and **functionality**.

One of the important SBR roles, which will be implemented by BPS in the near future, is providing a common frame from which individual survey frames can be sourced. These following benefits can be attained when a single live register is maintained and used to derive the common frames used for all relevant surveys:

Harmonisation of the surveys

Increased potential for integration of survey data

Reduction of costs

Prevention of double counting

More coherence in the resulting statistics

4

What have we done?

DIFFICULTIES AND CHALLENGE
IN BUILDING BPS SBR

Enhance SBR Coverage

Based on the **institutional unit** standard classification, SBR must cover **not only corporation but also household, government, and NPISH**, comprise with national account standard (SNA 2008).

BPS Action

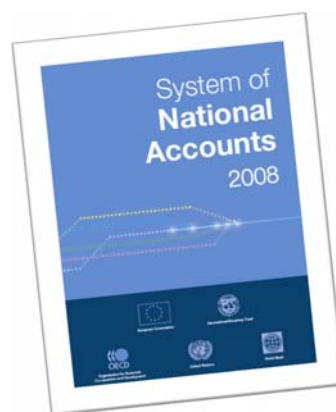

Establish cooperation with administrative data providers who maintain data covering all institutional units

7

Indonesian Standard Classification of Institutional Unit Development

For complete picture of units, there is a **need to implement institutional sector classification based on SNA 2008** which consists of **household, corporation, NPISH, government, and rest of the world**.

BPS Action

Starting this year, BPS is developing the Indonesia Standard Classification of Institutional Sector

8

Centralized Management

The challenge is to **transform the business directories updating & management from industrial basis to centralized (integrated) basis for efficiency, better quality and coordination**

BPS Action

Coordinating with all Subject Matter to specify their respective needs in updating directory and preparing the SBR system to accommodate the centralized update

9

SBR as Sole Frame

SBR as sole frame and coordination tool for every business surveys in BPS.

<http://rochdaledirect.co.uk/>

BPS Action

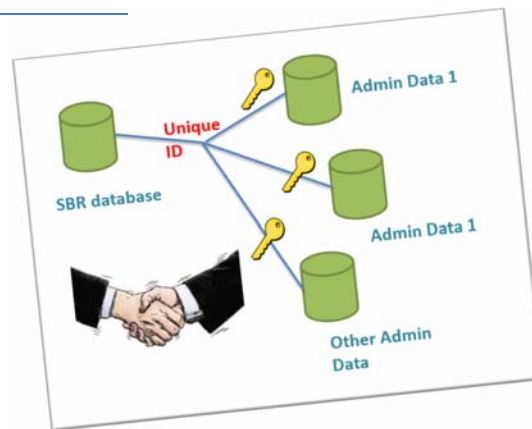

In this year, SBR Team coordinating with Methodology Team start to implement SBR role as sole frame for every business surveys in BPS

10

Selection And Negotiate The Access of Administrative Data for SBR Updating

In Indonesia, **business registration and permits spread** across various ministries based on industry with it's own regulation in each ministries and there is **no single unique business ID** across ministries.

BPS Action

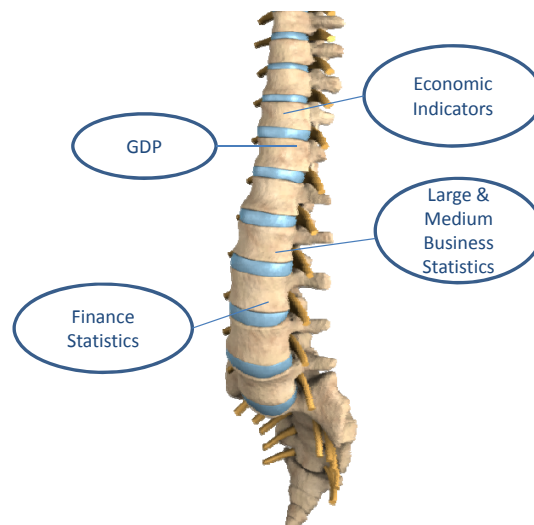

Coordinating with all data sources for SBR to select one existing ID that will be used in all ministries or propose to make a new regulation to define a single unique business ID in Indonesia

11

SBR as Independent Unit

SBR as a backbone for business statistics need full **encouragement as a independent unit** with its own dedicated human resource, dynamic budget and unlimited opportunity to spread up its wings. Currently, BPS still do not have a independent unit for managing SBR.

12

Higher Level Cooperation

To provide sustainable data, **Cooperation between BPS and Ministries/ Agencies** should be **enhanced** in form of Memorandum of Understanding (MoU). Currently BPS have signed MoU with Ministry of Finance and Coordinating Investment Board.

13

Business Self-Updating as a New Dimension of SBR System

Business Self-Updating on SBR System is being develop. This function will facilitate enterprise/ establishment so that they can see and update their own data.
