

E-learning course on measuring material flows in the SDGs | 7 March-1 April 2022|

8 DECENT WORK AND ECONOMIC GROWTH

This course introduced concepts relevant to compiling economy wide material flow accounts (EW-MFA).

It also covered the methodologies for the SDG indicators 8.4.1/12.2/1 and 8.4.2/12.2.2. EW-MFA represents a framework for describing the interaction of a domestic economy with the natural environment and the economy of the rest of the world in terms of flows of materials, waste and emissions; they are part of the broader System of Environmental Economic Accounting (SEEA) which is the international statistical standard for measuring the relationship between the economy and the environment.

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

Currently running...

Online Training Course on Statistical Data and Metadata eXchange (SDMX) Foundation |for six weeks from 28 March 2022|

The course is to target personnel at national statistical offices and other organizations involved in statistical data and metadata production who have little or no knowledge of SDMX.

The course also assists top and middle managers to strengthen their knowledge on SDMX and to decide on how SDMX will fit into and improve statistical business processes.

Further, there will be an advanced SDMX course which will feature SDMX Information Model, SDMX Content-Oriented Guidelines, and SDMX infrastructure and IT tools.

E-learning course on System of Environmental Economic Accounting – Ecosystem Accounting |11 April-10 June 2022|

The course introduces the System of Environmental Economic Accounting – Ecosystem Accounting (SEEA EA), the international statistical standard for organizing data about ecosystems, measuring ecosystem services, tracking changes in ecosystem assets, and linking this information to economic and other human activity.

The SEEA EA framework takes a spatial approach to organizing information on ecosystems. It supports the compilation of indicators for several global policy frameworks including the 2030 Agenda for Sustainable Development and related SDG indicators and the Post 2020 Global Biodiversity Agenda.

Workshop on Early Childhood Development Index 2030 (virtual) 18-19 May 2022

Deadline for nomination: 6 May 2022

Workshop is jointly organised with the United Nations Children's Fund (UNICEF).

The objective of the workshop is to familiarise participants with the ECDI2030 in order to promote its uptake in national data collection efforts, ensure the data are collected in a standard and robust manner, and illustrate how the resulting data can be used for programming, monitoring and advocacy.
