

Group 4

Second Workshop on Forging Partnerships in Statistical Training in Asia and the Pacific

Supply

- Need for mechanism to publish and make transparent the supply of statistical training.
- Internet could be a good medium

Demand

- At national level
 - there is a need to define training needs as part of human resource management
 - Human Resource management should follow out of national programming (NSDS)
- Global, regional and sub-regional level
same type of inventory within framework of programming

Participation in Network will also involve
commitment to contribute actively
(provide necessary information)
