Labour statistics systems-
Discussion on the engagement between NSOs & their national stakeholders

Tite Habiyakare,
Senior Statistician,
ILO Regional Office for Asia and the Pacific

**12th Management Seminar for Heads of NSOs in Asia & the Pacific;
2 – 3 December 2015; United Nations University, Tokyo, Japan**

Content

- Setting the scene: SDGs monitoring and LMIS

- ILO constituents and NSOs

- Partnerships between MoLs and NSOs

Employment related SDGs indic. (1)

| Goal	Indicators
1- No Poverty	2 (working poverty, social protection coverage)
4- Quality Education	2 (adults in formal/non-formal education, youth/adult with ICT skills)
5- Gender Equality	2 (time spent on unpaid work, women in top managerial positions)
8- Decent Work and Economic Growth	11 (labour productivity, informal employment, hourly earnings, unemployment rate, youth NEET, child labour, occupational injuries & time lost, *conventions ratification*, jobs in tourism, government spending in social protection, collective bargaining coverage)

Employment related SDGs indic. (2)

Goal	Indicators
9- Industry, Innovation and Infrastructure	1 (manufacturing employment)
10- Reduced Inequalities	3 (labour share of GDP, recruitment cost born by migrant worker in % of earnings, *migration policy indicator*)
14- Life Below Water	1 (ratification and implementation of ILO Maritime Convention)
16- Peace and Justice	1 (*cases of violence to … trade unionists and human rights advocates*)
TOTAL	**23 indicators (in 8 goals & 18 targets)**

Labour Market Information and Analysis System (LMIAS):
A Framework for a Coordinated and All-inclusive Approach

Involving ILO constituents

- Government: Ministries of Labour (MoLs);

- Workers organizations;

- Employers' organizations

As key users of labour market information,

Are producers of some decent work indicators.

NSOs partnerships with MoLs (1)

1. Various situations:

- NSO has a lead control on labour statistics systems (LSS), e.g. surveys and data release, and MoL is not at all involved;

- NSO implement surveys and data collection, MoL has control on data dissemination;

- MoL implement surveys and NSO provide advise, in both methodology, data quality, and dissemination;

- MoL leads all data collection, NSO is not involved.

NSOs partnerships with MoLs (2)

2. Any ideal situation(s)?:

- Roles/ responsibilities: NSO as responsible for data gathering and quality assurance, MoL for analysis and use of data for policy formulation;

- MoL providing political and budgetary support to NSO; NSO to ensure involvement of MoL technical staff in implementation;

- Other official key supporters: Education, Population, Planning, Finance, Economic Dev., Parliament.

NSOs partnerships with MoLs (3)

3. How ILO has been advising MoLs and NSOs:

- Principle: surveys should be done by NSOs, and MoL should be responsible for other labour statistics from administrative records;

- National statistics laws may be set otherwise: partnership is therefore important;

- A key tool used by ILO: MOUs between MoLs and NSOs during data collection programmes supported by ILO; stating agreed responsibilities.
