

**Currently Running**

**E-learning course on Foundational course on Statistical Business Register,**  
**From 26 September to 11 November**

This course is designed to provide a strong foundation for the concepts, methods and framework required to build high-quality and viable SBRs. This will facilitate the international harmonization of economic statistics in terms of coverage, statistical units, and frame methodology.

**E-learning course on Introduction to energy statistics and energy accounts**  
**From 3 October -18 November**

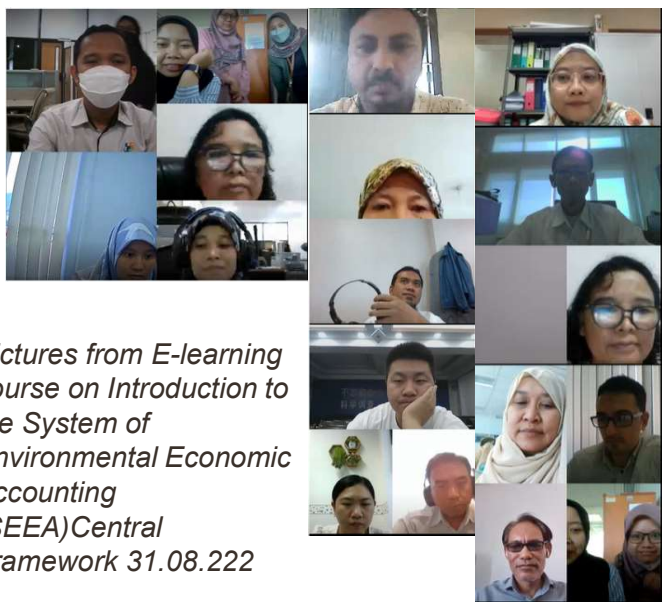

This course introduces concepts relevant to compiling energy statistics and accounts, including compilation of relevant SDG indicators. The topics covered include physical supply and use tables, asset accounts, valuation and data sources. Webinars will also be held as part of the course to provide an overview of the topics and allow participants to ask questions. Following the completion of the course and depending on resource availability, in-kind support will be provided to countries interested in the compilation of the energy accounts using tools that will be introduced and discussed during the course.

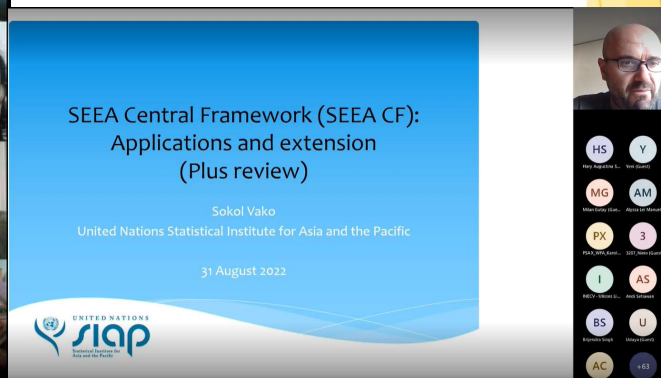

**New Self-Paced Course**

2022 Health Statistics for Monitoring the Sustainable Development Goals
