Workshop on Early Childhood Development Index 2030 |virtual; 18-19 May 2022|

This Workshop welcomed participation of government officials who are involved in data collection, dissemination and/or analysis for SDG indicator 4.2.1 in National Statistical Offices and relevant line ministries as well as practitioners who work on early childhood development programmes and policies in governments, civil society organisations and other development partner organisation in Asia and the Pacific and, beyond.

Four experts from UNICEF (Ms Claudia Cappa, Senior Adviser, Statistics - Child Protection and Development; Ms Nicole Petrowski, Statistics and Monitoring Specialist (Child Protection and ECD); Mr Jayachandran Vasudevan, Statistics and Monitoring Specialist & Regional MICS Coordinator; Mr Achraf Mohamed Mrabet, Statistics and Monitoring Specialist), acted as resource persons.

Currently running

[E-learning course on System of Environmental Economic Accounting – Ecosystem Accounting](#) |11 April-10 June 2022|

The course introduces the System of Environmental Economic Accounting – Ecosystem Accounting (SEEA EA), the international statistical standard for organizing data about ecosystems, measuring ecosystem services, tracking changes in ecosystem assets, and linking this information to economic and other human activity.

Upcoming

[E-learning course on health statistics for monitoring Sustainable Development Goals (SDGs) 2022](#) |4 July-12 August 2022|
Deadline for nomination: 30 June 2022

Invitation

The course is organised jointly with the World Health Organization (WHO).

The objective of this e-learning course is to address capacity gaps in health statistics by providing a general understanding of the basic concept, methods and framework required to compile and monitor the health and health-related SDG indicators.
