

CAPACITY DEVELOPMENT 4.0

Why foundational data capacity matters more than ever

UNSIAP – 3 December 2020

François Fonteneau, Deputy Head

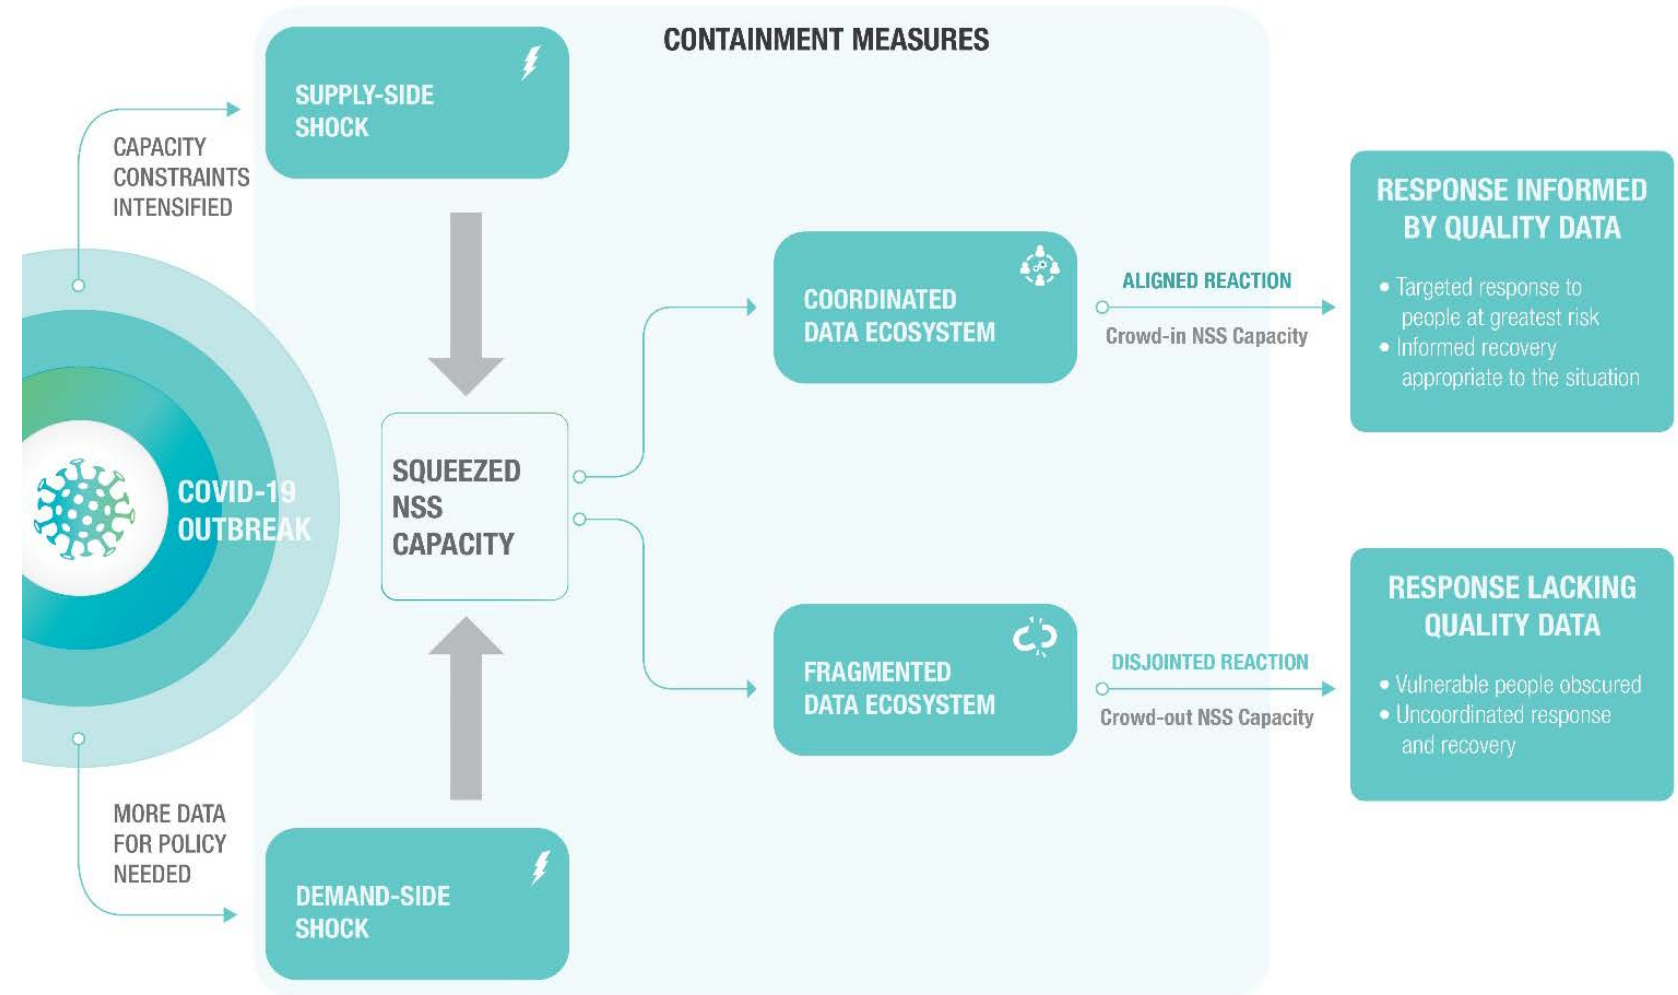

- COVID-19 and the new normal for statistical capacity
- Capacity Development 4.0 – Why it matters now ?
- What does CD4.0 mean for PARIS21?

COVID-19 and beyond: we need capacity

- **Misinformation:** Policy makers are impeded in their decision making
 - New data actors have published data on COVID-19
 - Quality was very heterogeneous, data were not trustworthy
- **Data gaps:** Policy makers lack data on specific issues
 - Economic statistics not available frequently enough
 - (Often) weak administrative data systems...but essential
 - Not enough disaggregated data to assess fragility of population, or sub-populations (gender)
- New skills required, new scale, new ways : **capacity revolution**

COVID-19: statistical systems squeezed

Misra, Schmidt and Harrison (2020)

“The process through which a country’s national statistical **system**, its **organisations** and **individuals** obtain, strengthen and maintain their abilities to collect, produce, analyze and disseminate high quality and reliable data to meet users’ needs.” (PARIS21, 2020)

The CD4.0 matrix

Target/Level	Individual	Organisational	System
Resources			
	<ul style="list-style-type: none"> • Professional background 	<ul style="list-style-type: none"> • Human resources • Budget • Infrastructure 	<ul style="list-style-type: none"> • Legislation, principles and institutional setting • Funds infrastructure • Plans (NSDS, sectoral...) • Existing data
Skills and knowledge			
	<ul style="list-style-type: none"> • Technical skills • Work know-how • Problem solving and creative thinking 	<ul style="list-style-type: none"> • Statistical production processes • Quality assurance and codes of conduct • Innovation • Communication 	<ul style="list-style-type: none"> • Data literacy • Knowledge sharing
Management			
	<ul style="list-style-type: none"> • Time management and prioritisation • Leadership 	<ul style="list-style-type: none"> • Strategic planning and monitoring and evaluation • Organisational design • HR management • Change management • Fundraising strategies 	<ul style="list-style-type: none"> • NSS co-ordination mechanisms • Data ecosystem co-ordination • Advocacy strategy

The CD4.0 journey

Discover the full report [here](#)

The CD4.0 value added

1

Holistic approach to capacity development of statistical systems: Digitalization, improved data access and use, privacy

2

Empower NSO as the national data steward: coordination with other govt agencies, user orientation, modern governance mechanisms

3

Increase financing to statistics: More and better funding for development data from domestic and external sources

Objectives

- Enhance sub-national gender statistics production in line with SDG monitoring needs
- Empowering communities to participate in the process

Outcomes

- Capacity assessed and training needs prioritized
- Virtual trainings and coaching delivered
- Meaningful data produced
- Community established

CD4.0 in practice – Example Philippines

Capacity Assessment

System/organisational level:
Resources, Skills &
Knowledge, Management

- Magna Charta for Women
- Legal Framework
- Existing Resources
- SDG Assessment

Training Needs Assessment

Individual: Skills &
Knowledge, Management,
Incentives

- Existing CBMS Trainings
- Different target groups in the LGU
- Organisational structures in the LGU

Virtual Training Sessions

System-level: Gender
Statistics for Policy
Making

Individual: Data
production and
Management

Individual: Data
Visualization

- **Recognize the value of systemic solutions**
- **Advocate for more and better funding**
- **Make NSS fit for purpose : digitalization, data sourcing, coordination**
- **Invest in data literacy: media, policy, people**
- **Let's all learn from change and re-think our approaches and ambitions**
