Action in 2019

January

- Database (contents empty) constructed by Japan

May

- Input training information from 2015 of SIAP

June

- Request for sharing training information to countries during 2015-2018 from SIAP

September

- Input training information from Malaysia, Thailand and Japan

4

Items of the Information

Title

Place

Period

Area of work

Name of experts

Level of target participants

Delivery method

Lecture material

Outline of training

5

How to Use the Database

Visit the website: <https://trdb.unsiap.or.jp/>

Enter ID and password which have been informed to countries, login and search

Enter input information for items and click “Search”

- Expert:** Mr. Alick Mjuma Nyasulu, Ms. Luisa Ryan, Mr. Paul Romanis
- Place of the Training:** Malaysia
- Target Participant:** Intermediate
- Method:** Face to face
- Outline:** MSBR is to provide central storage of administrative data that serves as a control file for data collection and processing; provide data for statistical products and source for economic research and finally as a database to assist in respondent relation and the management of respondent burden.

At the bottom of the browser window, the status bar shows: © 2019 - Training Resources Database, 11:05, 09/12/2019.

9

Way Forward

- Fill information in the database from more countries
- Systematize update of information
- Advancing usability
- Develop new tools focusing on specific information considering accessibility and usability beyond overview of training
 - * Topic oriented development
 - * Material sharing platform
 - * Experts database
